Birth_08.11.1995

Nationality_French.German

Mail_nico.izard08@gmail.com

« First interested by sport design, my different experiences have given me the desire to work on even more meaningful projects, in terms of sustainability and protection of environment.
 What thrills me is to work into projects, that can have a positive impact right now. I also like to work on advanced projects, and propose conceptual solutions, that challenge today's technologies, following the same goal to make the world evolve in a positive way.»
